“Success is not just about winning medals, but about giving your best on the court.”

The Inter-School Badminton Tournament held at Laurels International School, Shahabad, was a grand sporting event that brought together young talent from 16 reputed schools. The tournament created an atmosphere filled with enthusiasm, determination, and healthy competition, as students showcased their skills and passion for badminton. The event was meticulously organized, ensuring fair play and smooth conduct of matches across various categories. Participants displayed excellent coordination, agility, and strategic gameplay, reflecting rigorous practice and dedication. Each match was a true test of stamina and focus, keeping spectators engaged and cheering throughout the competition.

Make Every Moment Count ;Turn Time into Treasure

“The key is in not spending time, but in investing it.”

– Stephen R. Covey

Exams are finally over, and a world of freedom lies ahead! While it is important to relax and enjoy, this time can also become a golden opportunity to learn and grow in exciting ways. Instead of letting the days pass aimlessly, make each moment meaningful.

Start by building a reading habit. Dive into storybooks, comics, or inspiring biographies that take you on magical journeys. Reading not only strengthens your language but also fuels your imagination. Alongside this, try creative writing express your thoughts through short stories, poems, or a personal diary.

“Small steps taken every day lead to big achievements.”

You can also explore new skills. Whether it is painting, dancing, singing, cooking, or gardening, these activities help you discover your hidden talents. Helping your parents at home is another wonderful way to learn responsibility and kindness.

Do not forget the importance of staying active. Play outdoor games, ride a bicycle, or practise yoga.

A healthy body keeps your mind fresh and energetic. Spend quality time with your family and friends these moments create memories you will cherish forever.

Make learning fun by revising your lessons through quizzes, puzzles, or educational games. This keeps your mind sharp without any pressure.

Remember, holidays are not just for rest; they are for self-discovery and growth. Use this time wisely, and you will return to school more confident and ready. Holidays give you a chance to explore new hobbies, read interesting books, and learn things beyond the classroom. They are the perfect time to reflect on your strengths and work on your weaknesses. Spend quality time with family, build good habits, and try something new each day. Make your holidays meaningful, so you come back refreshed, inspired, and full of positive energy.

“Your time is limited, so don’t waste it living someone else’s life. Be yourself”

– Steve Jobs

Science: The Magic Behind Everyday Life

“Science is a way of thinking much more than it is a body of knowledge.” – Marie Curie

Have you ever wondered how a small mobile phone connects you to people across the world?

Or how airplanes soar high in the sky? The answer lies in one powerful word Science. Science is like a magical key that unlocks the secrets of the universe. It helps us understand how things work from the tiniest atoms within matter to the vast galaxies spread across space.

Every day, science works quietly behind the scenes, making our lives easier, faster, and more exciting. Think about your daily routine.

When you wake up, your alarm rings because of electricity. You brush your teeth using clean water supplied through modern systems. You travel to school in vehicles powered by engines. Even the food you eat is improved through agricultural science. Clearly, science is present in almost every moment of our lives.

“The important thing is to never stop questioning.”

– Albert Einstein

Science has helped humans to achieve incredible milestones. We have discovered life-saving medicines, explored the depths of the oceans, and even sent spacecraft beyond our planet.

These achievements reflect the power of human curiosity and innovation.

However, with great power comes great responsibility. Science must always be used for the benefit of humanity and the protection of our environment. By using renewable energy, reducing pollution, and developing sustainable technologies, we can build a safer and brighter future. Science is not just a subject in textbooks it is a journey of discovery. Every student who asks questions, performs experiments, and explores new ideas becomes a young scientist.

“Somewhere, something incredible is waiting to be known.”

– Carl Sagan
